### PROJECTS

#### Deminify.js

<https://github.com/foderking/Deminify.js>

A web app for "decrypting" minified / obfuscated javascript source. This can be useful for reverse engineering.

#### WhoProduced

[whoproduced.herokuapp.com](https://whoproduced.herokuapp.com)

WhoProduced is a website and app database of producer credits. It can also be used to view other song credits. Uses the Genius API.

#### Minimal React Template

<https://github.com/foderking/Minimal-React-Template.git>

A free, clean and minimalist template for building react apps that can kick-start development. All tools used are picked based on speed and lightness. Uses yarn for package management, parcel for bundling, and react bootstrap for UI. I created the template because I didn't like all the other popular alternatives like create-react-app etc.

#### Light-Chess

<https://github.com/foderking/react-chess>

A lightweight chess app written in react. Everything is written from scratch - No external libraries or frameworks.

### WORK EXPERIENCE

### EDUCATION

#### BSc, Engineering

2017 — 2023

University of Lagos

Bachelor's degree in Mechanical Engineering.

### SKILLS

**Programming Languages** — Python, Javascript, Typescript, C, C++, C#, MATLAB, Mathematica, Nim

**Frontend, Backend & Databases** — React, Bootstrap, Redux, Appollo, HTML, CSS, Express, Node, REST, GraphQL, Nextjs, Flask, MongoDB, SQL

**Development Environments** — Vim, Visual Studio Code, NPM, Yarn, Babel, Webpack

**Operating System** — Linux, Ricing, Virtual Machines, Command-line tools

**Others** — Unit testing (jest), Version Control (git), Algorithms/Data structures, CI/CD, Networking, Art/Design, Hacking/CTFs, Creative problem solving skills

### CERTIFICATES

- University of Helsinki FullstackOpen Full-stack
- University of Helsinki FullstackOpen GraphQL
- University of Helsinki FullstackOpen TypeScript
- University of Helsinki FullstackOpen Docker
- University of Helsinki FullstackOpen CI/CD
- HackerRank React Basic
- HackerRank Python Basic
- HackerRank JavaScript Basic
